PROFESSIONAL SUMMARY

Computer Science graduate and Software Engineer with hands-on experience designing and delivering real-world applications from requirements to implementation. Experienced in backend development, APIs, databases, testing, and AI-enabled systems, with practical work across distributed AI, logistics, and machine learning projects. Focused on building reliable, maintainable software that solves practical problems.

CORE SKILLS

Software Engineering: Flutter, Dart, FastAPI, Python, Node.js, JavaScript, REST APIs, Git

AI & Machine Learning: AI Agents, RAG, Generative AI, Machine Learning, CNN, TensorFlow/Keras

Data & Platforms: PostgreSQL, MySQL, Qdrant, Ollama, Streamlit

Engineering Practices: Requirements Engineering, QA & Testing, Project Planning, Problem Solving

EXPERIENCE

IT Solutions & Web Development Intern - Technical and Vocational Training Corporation (TVTC)

- Developed web solutions from requirements gathering and UI implementation to database integration and testing.
- Implemented database-backed workflows and responsive interfaces using PHP, JavaScript, MySQL, HTML, and CSS in a team environment.

Developer & Designer

- Built web and mobile solutions using Flutter, Node.js, JavaScript, PHP, MySQL, and REST API integrations.
- Translated user and business requirements into functional interfaces and maintainable software features.

PROJECTS

Lycosa - Distributed Multi-Agent AI Orchestration Platform

- Built a LAN-first distributed AI orchestration platform that coordinates workloads across local devices through a central controller.
- Implemented device discovery, role assignment, task scheduling, RAG routing, and human approval workflows.

Tech: Python, FastAPI, Flutter Desktop, PostgreSQL, Qdrant, Ollama, RAG, AI Agents

SafeHear-AI - Urban Emergency Sound Detection

- Developed a CNN-based audio classifier for emergency and normal urban sounds.
- Achieved 97.02% validation accuracy using acoustic features without visual surveillance.

Tech: Python, TensorFlow/Keras, Streamlit, Librosa, CNN

Darbak - Digital Freight Marketplace

- Developed a digital freight marketplace connecting shippers and drivers through competitive bidding, reducing reliance on manual coordination.
- Built core mobile and backend workflows for shipment management, user interaction, and data handling.

Tech: Flutter, Dart, Node.js, MySQL, REST APIs

Sahilha - Student-Centric University Web Platform

- Created a student-focused web platform for Umm Al-Qura University to simplify study organization and academic workflows.

Tech: JavaScript, HTML5, CSS3, UI/UX Design

Visits Systems

- Developed a visit-management web application from requirements gathering and interface design through deployment.
- Implemented registration and print-ready reporting workflows for college visit operations.

Tech: PHP, JavaScript, MySQL, HTML5, CSS3

Additional Projects: Public Library , Damaged Vehicle Check.

EDUCATION

Umm Al-Qura University - Makkah, Saudi Arabia

Bachelor of Science in Computer Science | 2026

CERTIFICATIONS

- Retrieval-Augmented Generation for Enhanced AI Outputs - IBM
- Make Agentic AI Work for You - IBM
- Cooperative Training Program - Technical and Vocational Training Corporation
- Secure Coding Practices - Coursera
- Introduction to Cybersecurity - Coursera

LANGUAGES

Arabic: Native | **English:** Full professional proficiency
