PROFESSIONAL SUMMARY

UI/UX Designer and Full-Stack Developer with practical experience in designing intuitive interfaces and building real-world applications using Flutter, Node.js, MySQL, JavaScript, HTML, CSS, and PHP. Strong in user-centered design, front-end implementation, workflow automation, and API-driven solutions. Combines visual creativity, technical execution, and teamwork to deliver effective digital products.

CORE COMPETENCIES

- UI/UX Design, Visual Design, User-Centered Design, Figma
- Frontend: HTML5, CSS3, JavaScript, Flutter, Dart
- Backend: Node.js, PHP, Java, MySQL
- AI & Automation: AI agents, automated workflows, FlowiseAI, API integration
- Tools & Security: Git, GitHub, Wireshark, secure coding practices
- Soft Skills: Leadership, collaboration, problem solving

EXPERIENCE

Freelance Developer & Designer

- Developing **Darbak**, a logistics platform using Flutter for the front end and Node.js with MySQL for the back end.
- Built interactive user interfaces and sample websites using JavaScript, HTML, CSS, and PHP.
- Applied problem-solving skills to coding challenges and automation-focused development.
- Designed user-friendly digital experiences focused on usability, clarity, and business needs.

Technical College – Cooperative Training Internship

- Led UI design and front-end implementation for team-based projects.
- Completed assigned tasks efficiently and contributed ideas to improve user satisfaction.
- Strengthened planning, execution, and teamwork skills through hands-on project work.

EDUCATION

Umm Al-Qura University, Makkah, Saudi Arabia

Bachelor of Computer Science | Expected Graduation: 2026

CERTIFICATIONS

- Secure Coding Practices – Coursera
- Introduction to Cybersecurity – Coursera
- Full-Stack Development Tracks (JavaScript, HTML, CSS, PHP) – Satr Platform
- Network Traffic Analysis – Wireshark and protocol analysis training

PROJECTS

- Darbak Logistics Platform** – Logistics platform built with Flutter, Node.js, and MySQL.
- Visits Systems** – GitHub project demonstrating practical system development for visit-related workflows.
